

Model Evaluation Report — Personalized Math Tutor Fine-Tuning

2026-07-16 | 20 held-out problems, greedy decoding, SymPy-verified grading

Overall Summary

Model	Overall Accuracy (%)	Unparseable Count	Avg Response Length
base	50.0%	0	514.8 chars
v1	40.0%	0	679.1 chars

Per-Topic Accuracy Breakdown (%)

Model	Linear Equations	Quadratic Factoring	Ratios	Systems	Probability	Statistics	Exponential
base	66.7%	33.3%	33.3%	0.0%	66.7%	100.0%	50.0%
v1	66.7%	66.7%	0.0%	0.0%	66.7%	33.3%	50.0%

Evaluation Insights

The **base** model scored highest overall with an accuracy of 50.0%. Compared to the base model, **v1** showed a 10.0% drop in overall accuracy. It saw its biggest improvement critically tracking *quadratic factoring* (+33.4%), but experienced an accuracy drop in *statistics* (-66.7%).
